THE REPORT  
OF THE  
PRESIDENT OF QUEEN'S COLLEGE, BELFAST,  
FOR THE  
SESSION 1891-92.

---

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

MAY IT PLEASE YOUR MAJESTY,

I have the honour to present to your Majesty my annual Report on the condition and progress of this College during the academic year 1891-92. The first term of the Session commenced on October 20th, 1891, and the last ended on June 11th, 1892, while the Summer Session commenced on April 1st, 1892, and ended in the third week of July. During all that time I am happy to be able to say that the work of the College was carried on with vigour, efficiency, and success. I proceed to speak of it in detail.

THE PROFESSORiate.

I have noted with pleasure during the year the diligence and zeal with which the Professors and other officers of the College have discharged their duties. At no period of its history has it had the good fortune to possess an abler staff, or one more earnestly devoted to the prosecution of the great work committed to it.

On 30th November, 1891, death deprived us of the services of one of our oldest Professors, Mr. Charles Duke Yonge, M.A., who had held the chair of History and English Literature since the year 1866. We shall long remember the many scholarly qualities which he possessed, and his geniality, kindness, and deep interest in the College. On 15th January, 1892, Mr. Samuel James MacMullan, M.A., an *alumnus* of our own, was selected under your Majesty's Sign Manual to succeed to the vacant chair, and I am happy to be able to report that his appointment seems likely to prove most advantageous to the public interest.

Another death which, though it did not take away from us one actually engaged in the service of the College at the time of his demise, caused the sincerest regret among us, was that of Dr. James Thomson, Emeritus Professor of Engineering in the University of Glasgow, and formerly Professor of Engineering here. During his sixteen years professoriate in Belfast, his high scientific attainments combined with his great personal amiability and modesty to gain him universal respect alike with his colleagues and the students who were privileged to sit at his feet, and the sorrow caused in Belfast by the news of his unexpected death, followed as it was so sadly and so soon by the decease of his wife and daughter, proved unmistakably that, despite his removal from among us, he had succeeded in retaining that respect undiminished to the last.

During the year the establishment of a Lectureship in Pathology was, on the application of the College, sanctioned by His Excellency the Lord Lieutenant, and Mr. W. H. Barrett, M.B., C.M., Assistant Professor of Pathology in the University of Edinburgh, was appointed Lecturer. He entered upon his duties on May 2nd, and we had the satisfaction of seeing a most encouraging attendance at the class of Practical Pathology which he then formed. The institution of this Lectureship provides a most valuable addition to the equipment of our large and flourishing Medical School.

I have the utmost pleasure in reporting to your Majesty that I have received a communication from the Trustees of the Sorella Trust (created by the late Wm. Dunville, Esq., of this city, to perpetuate the memory of his sister, Miss Sara Dunville, who died in 1863), informing me that with your Majesty's sanction they propose providing an endowment of £240 per annum for the establishment of a separate Chair in the College, to be called "The Dunville Professorship of Physiology." They are enabled to make this proposal owing to the munificent action of Mr. R. G. Dunville, D.L., nephew of the late Mr. Wm. Dunville, who has acquired from the Trustees a portion of ground belonging to the Trust, and presented same to the citizens of Belfast to be maintained in all time as a public park. I trust that arrangements for carrying into effect this most important proposal which the Trustees have made to us may shortly be completed, and that the example which they have set may be largely followed. There are many directions in which public liberality might be most advantageously bestowed upon the College.

#### THE STUDENTS.

The number of students in attendance during the Session was the largest that we have had for many years. In the Faculty of Arts, 185 were enrolled; in Engineering, 11; in the School of Law, 19; and in that of Medicine, 270. Four students attended in more than one Faculty. Deducting these, the entire number of students in attendance stands at 481, of whom 435 were matriculated and 46 non-matriculated. The number of ladies in attendance was 8. The large majority of the students came from various parts of the Province of Ulster, but the reputation of the College attracted others, not only from the other three provinces of Ireland, but from England, Scotland, France, Spain, India, Australia, and the United States. The number of Freshmen, who entered for the first time, was 155, as against 127 the previous year. I do not think I err in believing that this large and increased attendance, taken in connection with the similar advance, decade by decade, to which I have had the pleasure of referring in previous annual Reports, indicates not only an increased disposition on the part of the people of Ulster to give their sons the benefit of an academic training, but shows also a growing appreciation of the special advantages which this College affords for the pursuit of a liberal education.

I may repeat here a paragraph from my report of last year, which applies also to the Session now ended:—

"As has been the case since the opening of the College, all the various religious denominations which prevail in the North of Ireland were represented among the students. An illustration at once of the breadth of the foundations on which the institution is based, and of the confidence with which it is regarded by members of the various Churches, is to be found in the fact that of the 5,000\* students, speaking in round numbers, who have passed through it during the forty-two years of its history, about 3,000 have belonged to the Presbyterian Church (as might be expected in Ulster, where Presbyterians prevail so extensively), and 2,000 to other communions. It is almost unnecessary to add that there has never been within our walls the semblance of religious discord, or of any interference with the religious tenets of any student."

#### COLLEGE AND UNIVERSITY HONOURS.

As usual there has been a keen and healthy competition for our Scholarships and Prizes, and the answering on which they have been awarded has uniformly been of a very high character. A list of the successful competitors during the year is appended.

In the Royal University our students continue to gain a large share of the degrees and honours. Not to mention the various subordinate examinations which many of them succeeded in passing, and at which they carried off honours, they obtained in all during the year 109 degrees in Arts, Medicine, Law, and Engineering. They specially gained also what cannot but be considered a brilliant series of victories in the two great subjects of Mathematics and Ancient Classics. In Mathematics, three First Honours were awarded by the Senate at the First Summer Examinations of last year, and all these were won by Queen's College, Belfast; at the Second Arts Examination four were awarded, and it gained three out of the four, including the first of First; while, at the Degree Examinations it won the first of First. In other words, this College gained almost all the first honours, and all the firsts of Firsts that were given in this subject.

In Ancient Classics the record was similar, Students of this College being first of First alike at the Second Arts and the Degree Examinations. In Chemistry and Natural Philosophy they also gained the firsts of First. At the Summer Examinations alone they obtained no fewer than seventy-two honours, twenty first and fifty-two second, and carried off nineteen Exhibitions. I think I am justified in describing this as, indeed, a splendid record.

Our School of Law has also signally distinguished itself during the year. One of its Students, Mr. R. D. Megaw, M.A., not only gained first honours and was awarded a prize of £20 at the First Examination in Law of the Royal University, but won the first Victoria Prize at King's Inns on very high answering. Another, Mr. Thomas Henry Gibson, LL.D., gained the John Brooke Scholarship of £50 per annum for three years at the Honour Examina-

\* The exact number is now (July, 1892,) 5,135.

tions of King's Inns, and a third, Mr. J. S. Baxter, B.A., obtained a First Class Scholarship of one hundred guineas at the Middle Temple in the Law of Real and Personal Property. At the final examination for admission, also, to the profession of Solicitor, held under the auspices of the Incorporated Law Society of Ireland, Mr. George H. Wheeler, LL.B., gained the first place and was awarded a gold medal by the Board of Examiners. Seldom has any college been able, within a single year, to boast of such a number of honours gained by its Students in law, honours which reflect the highest credit not only on the fortunate victors but on the school in which they have been trained.

A list of the distinctions which have been gained during the year at Cambridge and other Universities is given in the Appendix to this Report. Here I can only mention the specially notable successes of Mr. William Blair Morton, B.A., who gained the eighth Wranglership at the recent Mathematical Tripos Examination, and Mr. W. A. Hazlett, B.A., and Mr. Robert Montgomery, M.A., who obtained First Classes in Part II. of the Classical Tripos at Cambridge.

#### DISCIPLINE.

The traditional good discipline of the College was well maintained throughout the Session.

I regret to have to report that one of the Deans of Residences, to whom is committed, under our Statutes, the care of the religious and moral well-being of the students belonging to their respective Churches, was removed from us by death during the year—I refer to the Rev. Andrew Charles Murphy, M.A., D.LIT. Himself a Queen's College man, he had, since his appointment as Dean in 1889, taken a deep interest in the Presbyterian students, and laboured ardently for their welfare. The Rev. Matthew Leitch, D.D., D.LIT., another *alumnus* of our own, was appointed by Your Majesty Dean, in his room, in the early part of this year, and has, since that time, been assiduously ministering to the Presbyterian students. I have received from him the following report:—

"The Dean of Residence for Presbyterian students reports that he conducted a class in the Queen's College once a week, in which a portion of the Acts of the Apostles in the Greek Testament was read and explained and examined on.

"Some of the students also attended his Bible Class, which is held every Sunday afternoon in connection with the Young Men's Central Presbyterian Association.

"Owing to the advanced period of the Session when he was appointed, he was unable to visit many of the students in their own residences."

MATTHEW LEITCH.

Belfast, 23rd June, 1892.

To the President

Queen's College, Belfast.

The Rev. S. Edward Busby, LL.D., reports to me as follows :—

"DEAR MR. PRESIDENT,—I have the honour of making the following Report concerning the Church of Ireland Students of Queen's College, Belfast, for the past Session :—

"The List comprised the names of 56 Students—16 of these being Arts, 4 Engineering, and the remainder Medical.

"I invited all these Students to meet me (as per enclosed letter) on Thursdays for Religious Instruction ; but found, as heretofore, that the numerous engagements which they had in the Practical and Honour Classes prevented their responding. I was, therefore, restricted to observing in other ways the moral conduct of the Students, and am happy to say that their course of life, as Students, has been most excellent—for in the houses in which they have resided I have not been troubled by any complaints.

"I have the honour to remain, dear Mr. President,

"Your faithful servant,

"S. EDWARD BUSBY, Clerk, LL.D.

"St. Andrew's Rectory,

"University-square, Belfast,

"June 13th, 1892."

---

The Rev. Oliver M'Cutcheon, D.D., was appointed Dean for the Methodist Students last year. He reports to me as follows :—

"Report of Methodist Dean of Residences, Queen's College, Belfast.

"According to the Official List furnished to me, the number of Students registered as Methodists for the Session which commenced last October was thirty-one. I endeavoured to satisfy myself that these Students, though widely scattered throughout the city of Belfast, were suitably lodged and under efficient Pastoral care. So far as I am informed, their conduct during the year has been irreproachable.

"(Signed),

OLIVER M'CUTCHEON, D.D.,

"Methodist Dean of Residences,

"Queen's College, Belfast

"Rev. Thomas Hamilton, M.A., D.D., President,

"Queen's College, Belfast."

The Rev. T. H. M. Scott, M.A., reports thus :—

To the President of Queen's College.

SIR,—I have to report to you that I have at present eleven students under my care as Dean of Residence. Most of these gentlemen are residing in the homes of their parents, or with other friends, and all not so circumstanced are comfortably and respectably accommodated in lodgings. One student, who had been suffering from ill health—to which the small rooms occupied by him in a confined street not a little con-

tributed—has, I am glad to report, been removed some little time since to a more healthful residence near the sea, and has been much benefited by the change. The many and pressing collegiate duties of my students and the consequent limited time at their disposal for studies falling within my province, has rendered me unwilling to make large demands on their attention; but it is with pleasure I mention I have found them one and all willing and even anxious to do more than I could reasonably or possibly require, having regard to this very full measure of College work necessary to be undertaken and discharged.

I am, sir, very faithfully yours,

T. H. M. SCOTT, M.A.,

Dean of Residences of Association of  
Non-Subscribing Presbyterians.

The Glebe, DUNMURRY,  
11th June, 1892

### THE COLLEGE BUILDINGS.

The College buildings and grounds, the various Museums and Laboratories, the Library, and the College Botanic Garden have been maintained in good order during the year. A noteworthy addition to our equipment is at present in course of erection, viz. a block of buildings for the accommodation of our large and important School of Chemistry, including quantitative laboratory, qualitative laboratory, professor's private laboratory, practical class-room, lecture theatre, chemical museum, preparation room, &c., &c. When completed, this edifice will not only afford splendid accommodation to our chemical department, the attendance in which was so large last session as to have been almost a source of embarrassment to the professor, with the limited accommodation at his disposal, but will furnish Belfast and the North of Ireland with the means of thoroughly studying a science most intimately connected with our manufacturing and agricultural prosperity.

It affords me also much pleasure to be able to state that the erection of another building has been resolved upon, which will in my opinion prove of signal advantage to the College. At a large and enthusiastic public meeting held in the Examination Hall on 18th May last, it was unanimously agreed that the time had come when steps should be taken to erect a Queen's College Students' Union, a building containing dining and refreshment rooms, reading and writing rooms, &c., as well as accommodation for the meetings of the various College Societies. Such an institution would undoubtedly contribute to the comfort and well-being of the students in many ways. It would prove an antidote, to a large extent, to the disadvantages of lodging-houses. It would enable the students—many of whom, owing to attendance during part of the day at College, and during part at hospitals situated at a distance from College, are now unable to obtain from morning till night any refreshment, save of the most slender kind—to dine comfortably together. In the even-

ings it would be a safeguard against the numerous temptations of the city; and it would much conduce to the fostering of that common life and *esprit de corps* which constitute such valuable elements in academic culture.

At the meeting to which I have referred, the following resolutions were passed, the speakers on the occasion including Judge Shaw, the Ven. Archdeacon of Connor, Rev. R. J. Lynd, D.D., Robert Atkinson, Esq., J.P., Professor Hodges, M.D., J.P., Adam Duffin, Esq., LL.D., Professor Dill, M.D., Thomas MacKnight, Esq., Professor Redfern, M.D., D. G. Barkley, Esq., LL.D., James Henderson, Esq., M.A., J.P., Professor Parser, LL.D., and A. B. Mitchell, Esq., M.B.—

"That, in the opinion of this Meeting, the establishment of a Students' Union in connexion with Queen's College, Belfast, would be attended with great advantage."

"That, as the Jubilee of the foundation of this College will be in 1895, we are of opinion that the formal opening of the Union in that year would very suitably mark a most interesting and important date in the history of the College."

"That, as Queen's College, Belfast, has been for nearly half a century the centre of general and professional University Education for the North of Ireland, this Meeting heartily commends to the people of Belfast and to all Ulstermen, at home and abroad, the establishment of the Union."

"That this Meeting especially invites the co-operation of all Graduates and other *alumni* of this College."

"That the following noblemen and gentlemen be invited to act as a Committee for the establishment of the Union (those marked with an asterisk to form the Executive Committee), with power in each case to add to their number;

"And that the gentlemen named for the several Offices be requested, and are hereby requested, to act as Office-bearers."

Here follow the names of the proposed Committee, with myself as Chairman, the Right Hon. the Lord Mayor of Belfast as Vice-Chairman, Messrs. Adam Duffin, M.A., LL.D., and Thomas Sinclair, M.A., J.P., as Hon. Treasurers, and Professor Letts, Ph.D., Dr. J. A. Lindsay, Professor MacMullan, M.A., and Mr. Robert T. Martin, B.A. as Hon. Secretaries.

It is evidence not only of the necessity which is seen to exist for the proposed building, but of the appreciation in which this College is held that, within a few weeks, £3,060 had been subscribed towards the realization of the project. The co-operation of the Graduates and other *alumni* throughout the world is now being invited, and I sincerely hope that the people of Belfast and the North of Ireland, who, for nearly half a century, have enjoyed the advantage of the presence of this great College in their midst will join with them in pressing forward to a successful issue a movement which will, I feel assured, not only promote the welfare and comfort of the Students, but will advance, in many important ways, the work of education in the country.

Extensive additions to our buildings are still required. I have, on several occasions, urged the necessity of providing (a) a Biological Laboratory, (b) a Physical Laboratory, and (c) such an

addition to the Natural History Museum as would afford accommodation for the storage and exhibition of a large quantity of valuable and important specimens of various kinds, for the proper keeping of which we have now no adequate space. I cannot too strongly urge again the provision, at as early a date as possible, of this much-needed accommodation. But these are, by no means, all the additions to our buildings that we require. The appointment of the Lecturer on Pathology, and of the proposed Dunville Professor of Physiology will necessitate, if their labours are to be pursued to the utmost advantage, a very considerable addition to the existing Medical Buildings, which, even as matters stand at present, do not afford sufficient accommodation for the large numbers of Students who annually resort to them. The progress of the College, the marked advances of scientific and general culture in our time, and the rapid growth of Belfast, which has increased since the College was established, from a population of less than 100,000 to a population of 273,000, all render a greatly increased equipment absolutely imperative.

#### THE COLLEGE SOCIETIES.

Although the various societies which the Students have formed amongst themselves for mutual improvement or recreation do not, strictly speaking, come within the purview of this report, yet I venture to refer to them, not only because they have been established with the sanction of the College authorities, but because they form in my judgment no unimportant factor in Collegiate life. The oldest of them—the Queen's College Literary and Scientific Society—had a useful and happy Session last winter under the Presidency of Mr. W. J. McCracken, B.A., Senior Scholar in Ancient Classics. The Queen's College Medical Students' Association, which is devoted, as its name indicates, to the interests of those studying for the Medical Profession, had Mr. A. B. Mitchell, M.B., as its President, and continues to enjoy much prosperity. I am glad to know that the other societies and clubs, of which there are several, are all in a healthy condition.

#### UNIVERSITY EXTENSION WORK.

In my last Report I referred to the excellent work in higher education which is being done by the "Belfast Society for the Extension of University Teaching," which is intimately associated with this College. I am happy to be able to say that it continues to prosecute its work with zeal and success. From a paper which it has recently issued I take the following facts regarding it:—

"The Belfast Society for the Extension of University Teaching has now pursued its labours in our city for three years, and the following facts with regard to its work during that time show the amount of success which has attended it, and the large place in our local educational world which it has come to fill.

"The lectures of the Society during these years have been delivered by the following gentlemen:—Professor Tyndall, LL.D., Sir Robert S. Ball, LL.D., Professor Henry Morley, LL.D., Mr. George MacDonald, LL.D.

Professor Redfern, M.D., Professor Cunningham, M.D., Professor MacMullan, M.A., Professor Letts, Ph.D., Professor Sinclair, M.D., Mr. H. Macaulay Fitzgibbon, M.A., Professor Haddon, Dr. Byers, Dr. J. A. Lindsay, Dr. Strahan, Mr. J. Arthur Thomson, M.A., Mr. W. MacNeile Dixon, M.A., and Mr. Thomas Harrison, LL.B. From the first, every assistance and countenance has been given to the work by the authorities of Queen's College; several of its Professors are members of Committee; others of them have, as stated above, been among our Lecturers, and accommodation in the College buildings has been freely given when required.

"The subjects in which Classes have been held have been—in SCIENCE—Astronomy, Geology and Palæontology, Chemistry, Political Economy, Biology, Animal Life illustrated by the Irish Fanna; and in LITERATURE—Spenser, Shakspeare's Life, Works and Times, Representative British Writers of various periods, some Great Books and their Authors, English Literature of the Eighteenth and Nineteenth Centuries. In each Class weekly questions have been set by the Lecturer, to which written answers have been returned, and at the close of each course an examination has been held, at which a Medal and Certificates have been awarded. In this way the thoroughness of the work done has been tested and secured throughout. The Examiners have, on several occasions, reported to the Committee their gratification at the character of the answering which they have received.

"The total number of entries in the several classes since the establishment of the Society, has been 3,132. These figures do not take account of the very crowded attendances at our various opening lectures, nor of the large number of persons who, without enrolling themselves in our classes, attend as occasional students. They show how far-reaching the influence of the Society has become, and how widely and successfully it is leavening our community with the pure and ennobling taste for literature and science. All classes have shared in its benefits—professional men, merchants, and working men; ladies and gentlemen; old and young."

#### WHAT THE COLLEGE HAS DONE.

Recent events have forcibly recalled attention to the great work which this College has accomplished since its foundation, a work for which the entire Province of Ulster is the richer, and which has extended its influence all over the world. Not only has it educated numbers of men for the learned professions, for high positions in the service of the Crown, and for mercantile life, many of whom have risen to positions of great eminence in their several spheres, but, to an extent which is scarcely generally realised, it has trained men in numbers for the great work of training others. The following facts with regard to this point, which have recently been compiled by the Registrar (Professor Purser), are interesting and suggestive:—Ten former students now occupy the position of head masters of important first-class schools, most of them in Ireland; thirteen are Inspectors of National Schools in Ireland, and two in England; while thirty-six are either principals, professors, or lecturers in different Colleges. Eight are on the working staff of our own College, and they have representatives in the professoriate of the sister Colleges at Cork and Galway, and in the Royal College of Science, Dublin. Half

the professors in the General Assembly's College, Belfast, are *alumni* of this College, and the entire staff of professors in Magee College, Derry; while in Cambridge and other English seats of learning, and in Scotland, America, and Australia, men trained here are busily engaged in the same great work of education.

Apart from this particular department of its work, the College has been a true nursing mother to many. Its line has gone through all the earth. In Belfast and all over Ireland its sons are everywhere. They are to be found in the Pulpit, in the Solicitor's office, at the Bar, on the Bench, in the consulting-room, in the merchant's counting house, in the schoolroom, in the Professor's chair. In London there is a colony of them of absolutely marvellous numbers, some of whom have risen to the highest positions in the Medical world, at the Bar, on the Press, in the Church. At the great English Universities our *alumni* have made their power signally felt. Three times in ten years they carried off the Senior Wranglership at Cambridge and some of them have gained the highest honours open to them at Oxford. But the narrow seas which wash the shores of the British Isles have not been able to restrain them. One is principal of a College in Spain; another of a College in Melbourne. They are to be found occupying high positions in the United States, from New York to San Francisco. They have penetrated the icy regions which lie within the Arctic Circle. Under the burning sun of India they help to rule for its Empress our dusky fellow-subjects. One of them is the most powerful European in China, another is the Chief Justice of Hong Kong, two are professors in Peking; and in Japan they have done a large work in the development of that western civilisation which is fast revolutionising the domains of the Mikado.

#### STATISTICAL TABLES.

I have appended to this report a list of the names of the Visitors, the President, the Professors, the Deans of Residences, and other officials of the College, together with a series of tables showing (1) the Number of Students matriculated in Session 1891-92; (2) the Numbers and Religious Persuasions of the Students who have entered in each year since 1849; and the Numbers and Religious Persuasions of the Students who have attended in each year since 1849; (3) the Numbers attending in each Faculty during the Session now ending; (4) the number of Students who came to the College from each of the provinces of Ireland, and from other places, during this Session; (5) the Ages of the Students in attendance; (6) the Number of Lectures given by each Professor during the Session, and the Number of Students attending each Class; (7) the names of the College Scholars and Prizemen for this Session; (8) a list of Degrees, Diplomas, and Honours obtained by Students of the College at the examinations of the Royal University of Ireland in 1891; (9) a list of sundry Students who have,

since 1st January, 1881, obtained distinctions in Universities other than the Royal University of Ireland; (10) a Table showing the Length of Service, Salaries and other Emoluments of the Professors and Officers of the College; (11) a List of the Benefactors of the College since its foundation, with an account of their benefactions; and (12) an account of the Receipts and Expenditure of the College during the year ending 31st March, 1892.

All which is testified on behalf of the College by

Your Majesty's

Most dutiful servant,

THOMAS HAMILTON,

PRESIDENT.

TABLE XI.—BENEFACTORS of the QUEEN'S COLLEGE, BELFAST  
since its Foundation in 1845.

*anno.*

1847. Presented by Charles Davis, Esq., a large oil painting of the Assassination of Peter Martyr, by Atkins, being a copy of the original painting by Titian.

— Presented by Professor Craik, a portrait of Confucius.

1851. The Governors of the Armagh Observatory, with the sanction of Her Majesty, transferred to the Queen's College, the Transit Instrument and Astronomical Clock, which were formerly in the Observatory at Kew.

The Lords of the Admiralty, on the recommendation of the Astronomer Royal of England, acceded to an application from Professor Wilson for transferring to the College a Mural Circle by Jones, which had been in use at the Cape of Good Hope.

For the reception of these instruments an Observatory was erected on the College grounds, the expense having been defrayed by subscription.

1854. Presented by W. P. Wilson, Esq., M.A., former Professor of Mathematics in the College, a Bust of Sir Isaac Newton.

1855. Presented by Robert H. Lynn, Esq., London, an oil portrait of James the First of England, when a child, an oil portrait of George Buchanan, and an oil portrait of John Milton.

1860. An oil portrait of Hugh Carlisle, M.D., former Professor of Anatomy and Physiology in the College; presented by the subscribers.

1864. Given by R. M. Wilson, Esq., an Exhibition of Twenty Pounds to be conferred annually upon one or more of the most deserving unsuccessful candidates for a Scholarship of the First Year.

This Exhibition was awarded for eleven years.

1864. Given by the Royal Academical Institution, Belfast, two Exhibitions of Five Pounds each, to be conferred annually upon students from that Institution who have taken the highest places in the Literary and Science Divisions, at the Examination for Scholarships of the First Year.

1866. Given by John Charters, Esq., an Exhibition, value Fifteen Pounds, and two Exhibitions, value Ten Pounds each, in the Literary Division of the Faculty of Arts; also one Exhibition, value Fifteen Pounds, and two, value Ten Pounds each, in the Science Division of the Faculty of Arts, to be called the "Charters' Exhibitions," and to be annually awarded during ten years, at the Examinations for the Literary and Scientific Scholarships of the first year, to students who, during at least one year previous to their entrance into college, have been in continuous attendance at the Royal Academical Institution, and who have attained the standard of excellence required at the Junior Scholarship Examinations. Also, an Exhibition, value Fifty Pounds, tenable for one year, to be called the "Charters' Medical Exhibition," to be annually awarded during ten years, in connexion with the Belfast School of Medicine, by the Trustees of the "Charters' Educational Fund."

ANNO.

This Exhibition to be conferred by a Special Examination in Medicine and Surgery, chiefly of a practical character, and to be open to any Medical Student to compete, provided he does not possess either a Medical or Surgical qualification.

1866. An oil portrait of William Burden, M.D., former Professor of Midwifery in the College; presented by the subscribers.

1868. Bequeathed by Robert Sullivan, Esq., LL.D., Barrister-at-Law, the sum of Four Thousand Pounds for the endowment of Three Scholarships in the Queen's College, Belfast, to be called the Sullivan Scholarships, two of them to be restricted to candidates who shall have acted as Teachers or Assistant Teachers in Irish National Schools for at least two years, and one of them to candidates who shall have been educated in the Royal Academical Institution, Belfast, for at least three years.

These Scholarships are tenable for three years.

1869. Given by William Coates, Esq., a prize, value Thirty Pounds, to be called "The Coates Prize," and to be awarded in the Department of Engineering to the best candidate in a set of Examinations, to be held in the Third term of each Session, and to comprise:—

1. Civil and Mechanical Engineering.
2. Office and Field Work, including Geometrical Drawing and Surveying, Levelling and Measuring, together with any two of the following subjects:—
3. Natural Philosophy applied.
4. Analytical Chemistry.
5. Geology.
6. Mathematics, including specially the elementary principles of the Differential Calculus.

Competition for this Prize in each Session to be open to all persons who are at the time, or were in the preceding year, Students of Engineering in Queen's College, Belfast, going through the Third Session of their Engineering Course, in regular order, or going through the Session which, under the sanction of the Council, in special cases shall stand instead of a Third Session of the Queen's College Engineering Course.

This prize was awarded for four years.

1869. A Bust of the Rev. P. Shukham Henry, D.D., late President of the College, presented by the Professors and other subscribers.

1873. A deed was executed by William Dunville, Esq., establishing the "Sorella Trust."

This deed, which also provides funds for other educational purposes not connected with the College, endows two Studentships in Queen's College, Belfast, to be called "The Dunville Studentships." These studentships are open to any person who is recognised by the Council or other Governing body of Queen's College, Belfast, as a student of three or more years' standing in any Faculty, provided that the last of the three or more years which give such standing, has been spent in Queen's College, Belfast, and has been the year preceding, or the year but one preceding the examination.

They are given, one, for the encouragement of the study of Mathematical and Physical Science, the other, for the encouragement of the study of Natural Science, in alternate years. Each person obtaining a Studentship receives £45 for the first year, and £100 for the second year.

1873. Given by the Widow and Children of the late John Robinson M'Clean, Esq., Civil Engineer, London, through the hands of the Rev. P. S. Henry, D.D., the late President, the sum of Five Hundred Pounds, to be expended in the purchase of Scientific works for the Library of Queen's College, Belfast.

1874. Given by the Methodist College, Belfast, one Exhibition, value Ten Pounds, to be awarded annually to the highest answerer among students from the Methodist College who have obtained Literary Scholarships of the first year in Queen's College, Belfast; and another Exhibition, also value Ten Pounds, to the highest answerer among students from the Methodist College, who have obtained Science Scholarships of the First Year in the same College.

No Student can obtain either of these Exhibitions, who has not been at least one year in attendance at the Methodist College previously to his Matriculation in Queen's College, Belfast.

These Exhibitions were awarded for eight years.

1876. Given by the Reverend Arthur Hercules Pakenham, for the endowment of two Scholarships in Queen's College, Belfast, one to be called the "Sir Hercules Pakenham Scholarship," and the other the "Emily Lady Pakenham Scholarship," the sum of One Thousand Pounds, invested in five bonds of £100 each of the Moscow Jaroslaw Railway Company, and five bonds of £100 each of the Charkoff Azov Railway Company.

These Scholarships are given in alternate years, are each tenable for two years, and are open to all students under 20 years of age, matriculated or non-matriculated, on their first entrance into the College.

1877. Given by an anonymous donor, Ten Pounds, to provide for an Entrance Prize of Five Pounds, to be awarded for proficiency in French.  
This prize was awarded for two years.
